Yellowstone National Park 🐻🌋

Yellowstone is a giant outdoor science lab full of bubbling geysers, colorful hot springs, and amazing animals—perfect for curious kids! These facts keep things simple, fun, and easy to remember.

1. Yellowstone was the first national park in the whole world

- It became a national park in **1872**, making it the very first one ever created.

2. The park sits on top of a supervolcano

- Yellowstone's volcano hasn't erupted for **640,000 years**, but it still heats the geysers and hot springs.

3. Yellowstone has more geysers than anywhere else on Earth

- That includes the famous **Old Faithful**, which shoots hot water high into the air on a regular schedule.

4. It's home to lots of cool animals

- Kids might spot **bison, elk, wolves, bears**, and even tiny creatures like marmots and pikas.

5. Yellowstone is HUGE—bigger than two states combined

- The park is so big that it's larger than **Rhode Island and Delaware put together**!
